What is the FBI InfraGard Program?

InfraGard is an information sharing and analysis effort serving the interests and combining the knowledge base of a wide range of members totally over 7000 nationwide. At its most basic level, InfraGard is a cooperative undertaking between the U.S. Government (led by the FBI and the NIPC) and an association of businesses, academic institutions, state and local law enforcement agencies, and other participants dedicated to increasing the security of United States critical infrastructures.

All InfraGard participants are committed to the proposition that a robust exchange of information about threats to and actual attacks on these critical infrastructures is an important element for successful infrastructure protection efforts.

The goal of InfraGard is to enable the flow of information so that the owners and operators of infrastructure assets can better protect themselves and so that the United States government can better discharge its law enforcement and national security responsibilities.

More information on the chapter can be found at www.ndinfragard.org

Sponsorship Opportunities

In exchange for sponsorship fees, the Chapter will provide a variety of services and marketing opportunities, according to guidelines listed below. Exceptions or alterations to these guidelines may be made at the discretion of a majority of the Chapter Board of Directors.
